

Performance indicators for international collaboration

David E, Jane, Jean, David W,
Lerotholi, Bert, Mellissa, Tom,
Elizabeth A, Brigitte

How much do we collaborate?
Internally (between Centers) among conservers
and users

- # joint projects
- # joint outputs (indicator of quality)
 - Collective actions
 - Participation in annual SGRP meetings
 - Best practices
 - Germplasm exchange
- # of FTE partners (size & resources committed)
- # successful collective proposals

How much do we collaborate with external conservers and users?

- *# joint projects*
- *# joint outputs (indicator of quality)*
- *# of FTE partners (size & resources committed)*
- *# successful collective proposals*
- # complementary/supportive activities
- # joint/participatory planning events

Behaviour change

- # of publications with partners (ratio/total)
- Ratio of project coordinatorships/total projects
 - participation without control
 - give others ownership

International Treaty

1. # of international exchanges of germplasm
2. # SMTAs for non CG collections
 - Distribution is proactive in demonstrating benefit of exchange

Categories of partners

- # of links (active contacts) to on-farm/community-based partnerships?

Partner/customer satisfaction

- Yearly survey – rating satisfaction 1-5
 - Joint project partners
 - Key partner(s) surveyed – i.e. National programs working on same crop – common objective
 - How well was service performed?
 - Note: active partnerships/links to cover gaps in the genepool
